„Espresso-Player mit sattem Sound […] schwarz und stark."

Handelsblatt, 09.07.2004 - iriver H320

„Ottima la riproduzione audio!"

PC Home, 08/2004 – iriver H320/H340

People used to launch into telephone conversations by asking "How are you?" Today, though, the first thing they say is "Where are you?" We are always on. We can read e-mails wherever we are. We have computers, PDAs and smart phones. Soon we will even have refrigerators with Internet connectivity.

The "information age" is on everyone's lips. Yet music is information too – as are images and films. We consume information, process it, gather it, set it aside. The biggest problem, it seems, is not acquiring it but finding just the right bits of information from the flood that constantly inundates us from myriad unfathomable sources. And then try finding the time to digest that information in peace and quiet…
Well, why not just take the time? Take your music with you on your travels. Watch a film on the plane or in the train.

Sit back and relax. Listen with bated breath. Read attentively. Observe carefully. Watch avidly. But whatever you do, enjoy. Music. Images. Films. Wherever, whenever and however you want.

iriver

the future of entertainment

The F series combines practical size with the superb quality you would expect from iriver. Perhaps that is why it is our most successful line of players. Whether you want to go running, stuff it in your pocket or take it on the plane with you, you will find that the players in the F series give you everything you want: a shock-proof flash memory, compact dimensions, features you won't find anywhere else in this form, and a design that is singularly pleasing to the eye. Oh yes, and a price that will be music to your ears.

- Magnesium casing with a 1.2" color LCD
- Supports MP3, WMA and OGG Vorbis
- A combined analog and opt. dig. line-in
- available in 256, 512 MB and 1 GB
- Built-in FM tuner
- Built-in microphone
- Up to 40 playback hours
- Real-time clock with music or radio alarm function

iFP-999/995/990

iriver's flagship flash player – for feature-hungry music lovers who demand superb sound quality
The iriver iFP-900 series is iriver's flagship flash player for feature-hungry music lovers who demand superb sound quality. An elegant design – the iFP-900 features a magnesium casing and a 1.2" color LCD – underscores the stylish appeal of this product.

Three different memory sizes are available: 256 MB, 512 MB or a stunning 1 GB with room for more than 250 MP3 titles or 500 titles stored in WMA or OGG Vorbis format. Despite compact dimensions of only 64 x 51 x 20 mm, this top-of-the-range flash player comprises nothing but the best components and truly reflects the state of the art. Its built-in FM tuner has an automatic radio channel search function and can record direct from radio broadcasts.

A built-in microphone supports digital voice recording. And a combined analog and optical (digital) line-in lets you record external audio signals directly with virtually no loss of quality. The color LCD makes for easy viewing of your latest holiday snaps, which you can even define as your wallpaper. The flash player also delivers lavish reserves of power: Its built-in rechargeable lithium ion battery gives you up to 40 playback hours. Even the controls on the iFP-900 series add a touch of luxury.

A completely new graphical user interface design guides you intuitively through every menu item – no more blind alleys, no more confusion.

If nothing but the best will do, the iFP-900 series is the one for you!

iFP-899/895/890/880

- Supports MP3, WMA and OGG Vorbis
- Available with 128, 256, 512 MB or 1 GB
- Built-in FM tuner that can record straight from radio broadcasts
- Built-in microphone
- Line-in for real-time MP3 encoding of external audio signals
- Built-in real-time clock
- Up to 40 playback hours
- Ultra-simple controls and extremely compact design

Walk it, drive it, fly it, ride it – the flash player for music on the move is small on size but big on performance. iriver iFP-800 is a series of compact flash players that deliver top performance whether you are flying, driving, riding the train or just stretching your legs!

At a diminutive size of just 89 x 36 x 27 mm and a feather-weight 40 grams, the iFP-800 fits neatly in even the smallest pocket to give you music wherever you go – for up to 40 hours at a time off just a single battery!
Different models offer storage capacity from 128 MB to a whopping 1 GB. The top end of the range thus has space for more than 250 MP3 titles or 500 titles stored in WMA or OGG Vorbis format. Titles can simply be dragged and dropped onto the flash player.

The iFP-800 series impressively demonstrates the state of the art, featuring a built-in FM tuner complete with recording function, a microphone for digital voice recording and a line-in to record external audio sources (including real-time MP3 encoding). A real-time clock with an alarm function and an absolutely intuitive control design add the finishing touches to this tiny masterpiece.

- Supports MP3, WMA and OGG Vorbis
- Available with 128, 256, 512 MB or 1 GB
- Built-in FM tuner
- Built-in microphone
- Line-in for real-time MP3 encoding of external audio signals
- Built-in real-time clock with alarm function
- Up to 40 playback hours
- Simple controls and lightweight design

iFP-799/795/790/780

Staying power from iriver – the compact, agile flash player that is bursting with features and just runs and runs and runs…

iriver iFP-700 is a series of agile flash players that boast tremendous staying power and are literally bursting with features. A compact, lightweight design – the iFP-700 weighs in at just 37 grams – makes this series the ideal companion for all your leisure activities. What is more, a single battery can give you a stunning 40 playback hours!
Different models offer storage capacity from 128 MB to a whopping 1 GB and allow the storage of hundreds of files in MP3, WMA or OGG Vorbis format. Reproduction is always crystal clear in any format, however.

Drag & drop functionality naturally makes it easy for you to copy any kind of data you choose to the player. And an intelligent control layout makes it child's play to use the flash player – even when you are jogging, power walking or whatever!

What really sets the iFP-700 series apart, though, is its breathtaking array of sophisticated features, including a built-in FM tuner that automatically stores radio channels and lets you record straight from radio broadcasts, a line-in that lets you record any external audio signals (and MP3-encodes them in real time), plus a real-time clock/alarm function. Add to this the bright blue backlit display and the extensive array of accessories supplied with the product, and it is obvious why the iriver iFP-700 series is the digital audio player of choice for sports enthusiasts and other active users.

- Support MP3, WMA and OGG Vorbis
- Unrivaled sound quality
- Built-in FM tuner
- Built-in microphone
- Over 20 playback hours
- Intuitive usage – ideal for newcomers to MP3 files
- Excellent quality and optimal value for money

iFP-180T

The convenient doorway to the world of flash players – top performance at a rock-bottom price.

The iriver iFP-180T is a wide-open door to the world of flash players. No other high-quality product in its class offers so much detail, so many features and such unbeatable value for money.

The iriver iFP-180T trumps up with crystal-clear reproduction of all kinds of audio formats (such as MP3, WMA and OGG Vorbis). But it also has an integrated high-grade FM tuner that features excellent reception and a built-in microphone for digital voice recording.

Its 128 MB memory has room for as many as 30 MP3 titles – or whatever other data you choose.
And just a single battery delivers over 20 playback hours. The bright backlit display clearly shows everything you need to know about each title.
Intuitive menu guidance makes the iFP-180T ideal for newcomers to MP3 files. What could be simpler?

Why do we call a single player a "series", you might ask? Well, we are so pleased with the N10 that it will definitely be getting a few more family members sooner or later. But don't take our word for it: see (and hear!) for yourself! Have you ever seen so much elegance packed into such a small player? And we guarantee you won't believe your ears.
The only problem is what you will wear to go with it. Do those shoes really match?

- Trendsetter for the fashion-conscious lifestyle generation
- Eye-catching design
- Exceptionally bright, high-contrast OLED display
- Supports MP3 and WMA
- Available with 128, 256 or 512 MB
- Built-in microphone
- Up to 12 playback hours

N10

The iriver N10 is the trendy fashion player for the lifestyle generation. Based on a new and utterly unique concept, it can be slipped into your pocket like any conventional MP3 player or worn gracefully around the neck as a fashion statement. High-grade earphones are built into the neckchain.

The exceptional appearance of the iriver N10 is the forerunner of a completely new design generation – the first of future models. This smart little trendsetter measures just 62 x 27 x 13 mm and weighs only 24 grams, but it is bursting with surprising technical innovations. Its bright blue backlit OLED display has a special coating that generates stunning luminosity and sharp contrast yet consumes very little power. N10 users can choose between a series of different motifs for the display while it is in use – effectively transforming a piece of technology into a trendy, ornamental neckchain. The built-in rechargeable battery delivers up to 12 playback hours and can easily be recharged via the USB port on your computer.
A built-in microphone produces very high quality digital voice recordings. The iriver N10 is available with either 128, 256 or 512 MB of memory. Intuitive controls that include all kinds of personalization options add the finishing touches to this eye-catching little MP3 player.

A must for every fan of leading-edge fashion accessories.

One main reason why digital audio players are so popular is that they let you take more than just an hour or two's music wherever you go.
The real luxury models actually boast playback times of up to a month without a single break – and without a single repetition. Try finding a radio channel that can do that! Even so, to make sure the choice is always yours, we have also fitted a radio receiver.
The H series really does think of everything.

- 2" color display for photos and eBooks
- Supports MP3, WMA and OGG Vorbis
- USB On-The-Go (OTG) function
- Room for over 10,000 (5,000*) titles
- Built-in radio featuring real-time MP3 encoding
- Drag and drop file transfer
- Compact size, high-grade workmanship and attractive design

H340/320

A bright new day: iriver presents the world's first pocket jukebox with a color display and space for your digital holiday snaps.

The iriver H340/H320 is the world's first pocket jukebox with an integrated 2" color LCD. You can thus display images or read eBooks.
A practical USB On-The-Go function also lets you connect your digital camera straight to the H340/H320** to view and archive your holiday snaps. The 40 (20*) GB hard drive has plenty room for over 10,000 (5,000*) titles or masses of other data. A built-in radio with outstanding reception provides for even more musical variety – and even supports MP3-quality recording.

The powerful rechargeable battery delivers and impressive 16 playback hours. And an emergency battery pack (optional) is there to help out even when there is no plug socket in sight.
The iriver H340/H320 is child's play to use. A USB 2.0 link to the PC lets you drag and drop music onto the hard drive in seconds.

This compact luxury music player proves that small is indeed beautiful – and will give you endless hours of fun and entertainment!

* H320 model

** Depending on the camera model

- Room for over 10,000 titles
- A combined analog and optical (digital) line-in and a corresponding line-out – plus support for MP3, WMA and OGG Vorbis
- Real-time MP3 encoding at freely selectable bit rates
- Large, bright blue backlit four-line display
- Wireline remote control unit
- Built-in radio
- Drag & drop file transfer
- High-grade workmanship and an attractive design – the H140 won the EISA award for 2004 / 2005

H140

The award-winning high-end jukebox for price-conscious music lovers – with perfect sound and stunning design.

The iriver H140 is the award-winning high-end jukebox for price-conscious but feature-hungry music lovers who demand superb sound. Earphones (supplied) and the combined analog and optical (digital) line-out deliver crystal-clear reproduction of various compressed audio formats, such as MP3 and OGG Vorbis. The same feature at the line-in enables external audio signals to be recorded with virtually no loss of sound quality – and with real-time MP3 encoding. Data can be dragged and dropped onto the 40 GB hard drive in seconds. All in all, the drive has room for over 10,000 titles or masses of other data.

The iriver H140 won the EISA award "Multimedia Product of the Year 2004/2005", drawing accolades mainly for its unusual, attractive design, generous array of features (including a built-in FM tuner) and ease of use.

With such outstanding value for money, the H140 jukebox is quite simply a must for every music lover!

What doe the "M" in our M series stand for? Music, movies and more? Miniature cinema? A magical milestone in the marvels of multimedia? You'll have to find out for yourself. Because it is quite simply impossible to reduce such a versatile product to a one-size-fits-all statement.

The M series is bursting with features but still child's play to use – the way every player should be. Revolutionary ideas brilliantly executed. Superlative quality. Quite obviously, we are talking about the M series from iriver.

PMP140/120

- 3,5" color display
- Supports MP3, WMA and WAV
- Supports DivX and XviD
- USB On-The-Go (OTG) function
- Beautiful sound with a perfectly balaced frequency response
- A built-in radio
- High-grade workmanship and an attractive design

The iriver PMP (Portable Media Player) series heralds a new era in portable electronic entertainments. You can now enjoy music and films wherever, however and whenever you want.
A luxurious array of features and support for a wide range of audio and video formats (such as DivX) make the PMP the media player of choice for technology freaks. The Linux®-based operating system provides a stable, reliable platform – and guarantees that future applications can be integrated swiftly in the form of firmware upgrades.

20 GB and 40 GB variants of the PMP are available. Both models boast an impressive range of features, including a built-in FM tuner, a USB On-The-Go function (for direct data transfer from other mobile products) and a line-in to record signals from external audio sources. The 3.5" color display plays films at a crisp, clear resolution.
And you even have the option of connecting the PMP via a TV output channel (NTSC or PAL) to a television or beamer and showing films in full resolution.

PMC140/120

- 3,5" Farbdisplay
- Supports audio formats, MP3, WMA and WAV
- Supports video formats, Windows Media Player
- Simple, excellent connection to your home PC
- Practical remote control unit to give you armchair control over every function
- Superb sound and perfectly balaced frequency response
- High-quality workmanship and an attractive design

The iriver Portable Media Center lets you watch films and images and enjoy music wherever you are.

Slide shows can be automated to the background music of your choice. A vast music library features ingenious sort options and even lets you display album covers. And, of course, the iriver PMC is the ideal platform for showing videos of all kinds.
So you can inflict your home-made holiday videos on any victim you choose at any time, watch TV programs anywhere (provided your PC has a TV adapter), and even take whole films with you on your travels.

The PMC is child's play to use and just as easy to fill with content. The software supplied with the product automatically adapts all videos and images so that they run perfectly on your PMC.
Two versions of the iriver Portable Media Center are available – one with a 20 GB and one with a 40 GB hard drive. Both models have a wide range of features, including TV and headset ports to let you play any content over your TV and/or stereo hi-fi system. In addition, a USB docking station and a handy carrying case are included in the package.
iriver even throws in a remote control unit, effectively upgrading this mobile entertainment marvel to a fully fledge digital audio and video player for home use.

iFP-1095/1090

- Built-in digicam with a resolution of 640 x 480 pixels
- 1.2" color LCD
- Supports MP3, WMA and OGG Vorbis
- 256 and 512 MB models available
- Built-in FM tuner
- Built-in microphone
- Up to 35 playback hours

The kind of thing you used to see only in agent movies is now available in the shops.

The iriver iFP-1000 series brings you the perfect trio: a digital audio player, digicam and radio all rolled into one. High-grade workmanship and an elegant triangular design combine with a 640 x 480 pixel (true resolution) camera lens hidden in a retractable cylinder to catch the eye – and steal the show from other players on the market.
When the camera function is activated, the 1.2" color LCD serves as the viewfinder you would have on any regular digital camera. But you can also use it to get a crystal-clear picture of snapshots from the player's own photo album.
The iriver iFP-1000 series is available with either 256 or 512 MB of memory and can play MP3, WMA or OGG Vorbis music files.

And all that is just for starters! Because the iFP-1000 also features a built-in FM tuner with an automatic radio channel search function and a built-in microphone for digital voice recording. A removable, rechargeable lithium ion battery can deliver up to 35 hours' continuous playback. Best of all, using this ingenious little all-rounder is literally child's play.
A completely new graphical user interface guides you intuitively through every menu item, keeping you in full control of any and every function at all times.

The CD has been around for well over 20 years now. Yet our C series has discovered so many more applications than even the boldest visionaries would ever have dreamed about two decades ago. Music, images, films… The sky is the limit.
Fancy going through all your old CDs? Or complementing them with the full spectrum of regular audio and video formats, all reproduced to perfection? Then look no further.

iMP-1100

- High-end multi-codec CD player
- Built-in 2" color LCD
- Supports all standard audio formats, such as MP3, WMA and WAV
- Supports video files compressed with DivX and XviD
- Wireless remote control unit to control all key functions
- Built-in radio with automatic radio channel storage
- TV output channel with PAL and NTSC support

The iriver iMP-1100 gives you a real gem of a CD player. Its astonishing versatility makes it a far cry from traditional products, casting the good old CD in a fresh, innovative new light and merging it with exciting new technologies.

The iriver iMP-1100 features an integrated 2" color LCD to show photos, the latest album cover – or even whole films or TV shows that you have recorded on your PC.
Where, when and how you watch them is up to you!

You can play audio CDs and watch compressed video formats such as DivX and XviD. And if that is not enough, the iMP-1100 also recognizes CD-ROMs, CDPlus, enhanced CDs and CD-RWs – not to mention virtually all standard audio formats, such as MP3, WAV and WMA!

What's more, it is child's play to use. And a wireline remote control unit (supplied) makes it even easier to operate the key functions.
What more could you ask for?

iMP-1000

- High-end multi-codec CD player
- Supports all standard audio formats, such as MP3, WMA and WAV
- Supports video files compressed with DivX and XviD
- Wireless remote control unit with blue display
- Built-in radio with automatic radio channel storage
- TV output channel with PAL and NTSC support

The iriver iMP-1000 lets you plug into all the rich diversity of the CD, anytime you choose, anywhere you choose. Immerse yourself in the new generation of multi-codec CD players that now reproduce both audio and video files.

The iMP-1000 supports all common audio formats (such as MP3, WMA and WAV) and also makes it simplicity itself to play compressed video formats such as DivX and XviD.
The latter can also be conveniently rerouted to a TV or beamer via the TV output channel. So you get to enjoy the latest movies or TV shows stored on your PC even when you are out and about.

This ingenious little creation naturally also copes effortlessly with CD-ROMs, CDPlus, enhanced CDs and CD-RWs. And a wireline remote control unit complete with blue backlit display (supplied with the package contents) makes it child's play to operate all the various functions.

The built-in FM tuner – an expensive accessory for most other CD players – guarantees that even the most avid listener will never run out of music!

- Elegant, ultra-flat design
- Supports all standard CD formats
- Multi-codec support for MP3, WAV and WMA
- Built-in FM tuner
- Wireline remote control unit with blue display to show ID3 information
- Extremely long battery life of over 120 hours with external battery pack

iMP-900

iriver has done it again!
Its iMP-900, the newcomer to the well-known SlimX-series, has now taken over as the world's flattest multi-codec CD player.
An exciting black and silver design deliberately sets the iMP-900 apart from the usual round CD players.
And more exciting still is the list of all the CD formats it can cope with – audio CDs, CD-ROMs, CDPlus, enhanced CDs and CD-RWs – and that with music stored in virtually every common format, such as MP3, WAV and WMA.

The iMP-900 also boasts a built-in digital FM tuner and a wireline remote control unit with a bright blue display that shows information about the title currently playing. In conjunction with the external battery pack (supplied in the package contents), this CD player delivers as much as 120 playback hours – simply amazing!

The iriver iMP-900 is the definitive way to hear CDs in style!

Can you measure quality? Can tech specs really reveal what a piece of equipment is worth? We think not. In any case, if you already know iriver you will not be asking "Should I?" but "Which one?"

Aware of this tricky "problem", we have condensed the key data for our players into a single table on the following page.
